

Orange Lodges Annual Picnic Held Tuesday

Interesting Address Given by John Heron, of Pincher Creek, on Early History of District

Coleman L. O. L. and L. O. B. A. members enjoyed themselves thoroughly on Tuesday afternoon at the sports grounds, when races were run for children and adults, including three-legged race, sack race, running races and kangaroo jump, which were all keenly contested. The obstacle race for men was an important feature of the program, the winner being Neil McKinnon, while the old-timer John Heron of Pincher Creek was awarded the booby prize. In the women's obstacle race Mrs. Muir of Coleman won, and Mrs. Dickson received the booby prize.

Mr. Heron reviewed in interesting style the years since this district was first settled, he being here before even the mounted police came west in 1874, and he later joined that famous force. He told of the country's development, and the exciting days of the Riel rebellion, which resulted later in Louis Riel's execution in Regina.

Mrs. Holmes of Coleman, spoke on the work of the Orange order and its relationship to the life of the country.

Rebekahs Had Pleasant Visit to Pincher Creek

On Tuesday evening a number of the members of Coleman Rebekah Lodge motored to Pincher Creek to attend the installation of officers of the lodge there. Three cars went from here, including the following: Mr. and Mrs. Bowen, Mrs. Evans, Mrs. Boulton, Mrs. Skelton, T. Higginbotham, Mrs. Fred Cox, Mrs. J. Nash, Harry Vincent of West Coleman, Mrs. Hope and Mrs. Neilson. The roads being in good condition, the party had a very pleasant trip, and were royally treated by the members at Pincher Creek.

The installing officer was Mrs. Jackson, who is a member of the Bellevue Lodge, but who is residing in Coleman.

New Salvation Army Officers Take Up Work

Captain and Mrs. J. Hind arrived last week to take over the work here, this being their first appointment since the captain's course in the training garrison, Winnipeg. Captain Hind came from Malton Main, Yorkshire, in 1923, and had worked in a coal mine for a number of years, his father also having been a miner, and who was killed in a disaster there.

The services for Sunday are Holiness meeting at 11 a.m., children's meeting at 2:30 p.m., Salvation meeting at 7 p.m. On Tuesday the soldiers' meeting will be held, and the usual open-air service nightly.

Mrs. McLeod of Edmonton is visiting at the home of her son, Supt. J. McLeod.

Big Demand For Trees

Mr. H. W. Lennox, inspector for the Dominion Forestry Branch, at Indian Head in an interview a few days ago regarding reforestation in Western Canada said:

The demand for trees has been insistent from all over the West. This year we have orders for eight million as against six million in 1926. In my district which stretches from Didsbury to the boundary, there are over 1600 new applications.

Principal Powell Has Resigned From Schools

Takes Position on Staff of Central High School at Calgary

The school board received the resignation this week of Principal R. G. Powell, who has accepted a position in Central high school, Calgary, where he will teach mathematics. He was principal here for six years, and was very successful with the pupils, having a very high percentage, and his resignation will be learned of with regret by a large number of the townspeople.

The board is now advertising for a new principal to take charge of Coleman schools on the re-opening.

Coleman Cubs Won From Fernie by 4-3

Snappy Game on Local Diamond Gave the Baseball Fans a Treat—Brilliant Plays by Cubs

Despite Fernie's reputation as a high-class team that would give the Coleman Cubs a tight run, the local boys won out in a snappy nine-inning game on Sunday afternoon with a score of 4-3. Fernie scored only in the third inning, while Coleman scored one each in the third and sixth, and two in the ninth, bringing to a close a game which kept the fans on their toes throughout. Coleman's double plays were a real delight to the fans, and with such playing Fernie had very little chance after their score of the third inning. Poluchuk pitched a splendid game for Coleman, and received good support from the field, especially from Runge on first base, and the veteran Hoggan, who on second base showed in a striking way that he can still give the younger players a few pointers. The game went through without a hitch and without a doubt it was the fastest game of the season on the local diamond, both in the style of play and the time occupied, the nine innings being played off in a little less than an hour and a half. Games such as this would give a great impetus to baseball, and deserve the support of the fans every time.

A return game will likely be played on Sunday next at Fernie.

The line up of the teams was:
Fernie 2h. Hogan
Zeith 3b. Wilson
Steinard c. Gardner
Brown 1b. Runge
Sikora p. Poluchuk
Pennington r. f. Padulla
Solonski l. f. Chapman
Maffoli o. f. Trokey
Kessman e. s. Gates

Score:
Coleman—0 0 1 0 0 1 0 0 2—4
Fernie—0 0 3 0 0 0 0 0 0—3

D. A. Howe, of Blairmore, representing the Metropolitan Life Insurance Co., was here this week on his monthly business visit.

Address Given By Bro. P. Locke, K.R.S.

True Meaning of Memorial Service and Fraternity of Knights of Pythias

The annual memorial convention is not so much to utter eulogies of our departed sisters and brothers for they stand in need of none—as to interpret the meaning of the gift of their fellowship to the temple. Fraternity is an altar on which we may forever keep alive the vestal fire of Brotherhood. It is a shrine at which some of the deepest and most sacred hopes of mankind may find age to age be kindled. These hopes must constantly be kindled in the breasts of men and women and only those who live may keep these memories alive. Hopes of men cannot be kept alive by words, neither are they perpetuated by creeds or constitutions. The object of fraternity is to transmute life's finer purpose into the life and action of society. The example of heroic men who have made their lives and embodiment of right and service and enlightened purpose, is the richest heritage of mankind.

The annual memorial convention is a reminder of time and approach of eternity. In every form the uncertainty of life is brought home to those who wait. This ceremony is intended to commemorate the virtues and the worth of our departed, to enshrine their memory in our hearts. Yet there is another meaning quite clear, a duty which we must not ignore. To remember kindly the sorrowing is the duty of all. These ceremonies are intended to clear away the things that block up the fountain of charity in our own hearts and prepare us to perform a service which after all is the true monument to sacred memory. No granite shaft need be erected to keep the memory of our departed forever green, for have they not with their own hands carved and fashioned a more enduring and lasting monument in the hearts of those who have felt their brotherly touch? These brave and tender souls, who in the storm of life were oak and rock, and in the sunshine were vine and flower, have left an imprint on heroic souls, which shall live so long as men honor goodness and love truth.

It is however fitting that we bring our floral tribute and by ceremony pay our respect to those taken from us. We look back and recall the days when they were among us, and we scatter flowers over their graves as evidence that they are not forgotten. May we not find some consolation in the thought, selfish though it may be, that as we remember those who have gone on, so when our days are numbered others will lay flowers upon our mounds and remember us as we remembered them. Memorial Day and our custom of observing it and the special purpose of its observation all combine to remind us of the beautiful and significant Egyptian custom of placing a skeleton at the head of the festal board. There in the midst of mirth and feasting at the ghastly herald and emblem of death. So it is in the lodge room, silently and motionless our memory turns back to scenes of joy and the absence of these brothers most eloquently remind us of our mortality in a language not to be misunderstood. No flight of fancy, no stretch of the imagination is required to comprehend the force of the lesson taught in this annual memorial. We pause and look around us and note the events which have marked the flight of

(Continued on page four)

Farmers Supporting Sugar Factory

Reports from the southern part of the province indicate that farmers in that section are giving strong support to the beet sugar factory at Raymond. To date some 7,400 acres of beets have been contracted to the factory and it is expected that fully 600 acres more will be included. A notable feature this season is the thorough preparation of the soil before planting, with the result that beets are making rapid growth.

McCulloch Won Competition

The Rod and Gun club competition on Sunday at Burnis resulted in Archie McCulloch landing the largest speckled trout of two pounds and the largest basket of five fish. Owing to high water the catches were not heavy. The next competition will be held at the North Fork on August 14th.

Presentation Made to E. F. Gare on Departure

Happy Gathering at Home of A. M. Morrison Where Departing Editor is Honored

On Thursday evening last about twenty citizens met at the home of A. M. Morrison, for the purpose of bidding farewell to Ernest F. Gare, who for the past six years has published and edited The Coleman Journal, and who recently disposed of his business and home.

The presentation was made by H. C. McBurney, who in happy vein expressed on behalf of those present their appreciation of Mr. Gare's qualities not only in the field of business, but as a good all-round citizen who had been willing to co-operate in matters pertaining to the welfare of the town. He stated that he would also be missed in the field of sport, especially among the members of the curling club, and he hoped wherever he might settle down, that success would attend his efforts as in Coleman. The presentation consisted of a handsome case of amber and briar pipes.

Mr. Gare, in accepting this tribute of good fellowship, said that it came as a complete surprise to himself, as he was preparing for his departure on the morrow when he was called. He deeply appreciated the spirit which prompted the gift, and would carry from Coleman nothing but the kindest feelings of friendship for those with whom he had associated in the last number of years.

Alex. Morrison in reminiscence vein told the first newspaper in Coleman, how he helped to erect the machinery, and later was asked to write something for the paper. This he did, he stated, and it was the first and last time he did so. However, he was sorry to see Mr. and Mrs. Gare leaving, as they had been good citizens, and Coleman could ill afford to lose such people. What was Coleman's loss would be another place's gain, and in bidding farewell to Mr. Gare, he extended a welcome to Mr. Halliwell and his family, and hoped they would settle down and enjoy life in the town.

Streams Stocked With Fish

Brown trout fry to the number of 185,000 have been placed during the past week in the North and South Raven Rivers and Prairie, Alford and Meneke Creeks which are tributaries of the Red Deer and Saskatchewan Rivers, west of Red Deer. The distribution was handled by Fisheries Inspector Martin of Banff.

To Our Readers

The Journal will be delivered to your home every Thursday by carrier boy if desired, at cost of 5c per copy. The yearly subscription rate is \$2.00 per year, and may be given to carrier boys.

Copies sent direct from office to any part of Canada for \$2.00 per year, including postage.

Crop Conditions In Alberta Very Good

Dominion Experimental Station at Lethbridge States Prospects Could Not Be Better

"Wheat in Alberta measured an average of 12 to 18 inches on the first of July," says the C. P. R. report, "with practically all earlier sown in shot blade. Winter wheat is heading out and coming along splendidly. Rapid growth is placing crops in normal condition for this time of year. A large amount of new land is being broken in Alberta in readiness for the 1928 crop season. Hail created about 50 per cent damage on June 30 over two thousand acres in the district immediately north of Blackie, on the Alderley sub-division."

The Dominion Experimental Station, Lethbridge, reports: Notwithstanding much late seeding, grain crop well advanced in southern Alberta. Ample soil moisture. Practically no insect damage. Some hail reported. About same area seeded as last year. Crop prospects at present could scarcely be better.

Military Headquarters Re-located

The headquarters of the North Alberta regiment and of A. Company will in future be located at Ponoka instead of at Killam and Camrose respectively, according to a recent announcement made by the Department of National Defence, Ottawa.

Oil Sands Reached in Two Wells

Further proof of the wealth of Alberta oil fields appears in the reports of two strikes made during the past week in wells in the Turner Valley Field. At the Dalhousie No. 5 well a heavy flow of crude oil testing about 42 Beaume is reported at a depth of 4,825 feet, while at the Regent well, production of crude oil testing about 60 Beaume was reached at 2,368 feet.

Alberta Salt Production

Alberta's contribution from the Fort McMurray district to the salt produced in 1926 amounted to 2,037 tons according to the recent report of the Dominion Bureau of Statistics. Of the total of 262,547 tons produced in the Dominion in 1926, 96.1 per cent came from Ontario, the remainder being contributed by Alberta and Nova Scotia.

Soviet Government Buying Horses

Representatives of the Soviet Government have been in the province during the past week arranging for the selection of the horses which are to go from Alberta as part of the 4,000 head being purchased in Western Canada. This is the largest single deal of its kind since before the war. The first shipment of some 1,400 head is expected to go forward from Quebec about July 15, on a Russian boat sent over specially for this purpose.

Coleman Won Tennis Games With Bellevue

Inter-Club Games Result in Victory for Coleman in Singles and Doubles

Inter club games were played this week between Bellevue and Coleman, the Bellevue team being J. A. Barber, E. C. Cosstick, W. Hamlet and Mr. Delane; Coleman team were R. F. Barnes, J. A. McLeod, Luke Lindoe and J. A. McDonald. In the singles McDonald defeated Barber and Lindoe defeated Delane; in the doubles Lindoe and McDonald defeated Cosstick and Hamlet, and Barnes and McLeod defeated Barber and Delane.

After the games the visitors were the guests at luncheon of the Coleman players at the Grand Union hotel.

Coleman players are scheduled to play at Corbin on Sunday next.

School Tax Rate Is Fixed at 22 Mills

At a special meeting of the school board held during the past week the tax rate for 1927 was set at 22 mills, and notices are now being sent out. A discount of 10 per cent is allowed on taxes paid on or before August 12, 1927.

H. C. McBurney was the successful tenderer for scale and school supplies.

Uses of Wealth

It is one of the tragedies of the world that those who know so much about spending money have so little of it to spend, while those who have much to spend know so little about spending it. The only comparable tragedy is that when poor people do achieve wealth they almost invariably lose the gift for knowing how to use it.

Two commonplace expressions are, "He has so much money he doesn't know what to do with it," and, "If I had his money." They may be said to represent the universal attitude of those who have little money toward the rich.

Who is so poor he does not imagine that should he suddenly become wealthy he would be able to dispense his wealth more intelligently than those of long established wealth? Rich people may appear to be happy, but it takes their poor friends to discover for them their unhappiness and its cause.

What the poor cannot understand is how the rich can be content with one house or one automobile, with staying home when there are so many opportunities for travel, why they follow one hobby and do not follow another, why they give to this and not to that charity, and so on ad infinitum.

It is said that the real difference between the old rich and the new is that the former always talk how poor they are and the latter tell how rich they are. After they learn the chief interest the public has in their wealth is deciding for them how they shall spend it and giving them good advice on the subject the new rich learn to talk about their poverty.

Advertising builds business and the best way to reach the people is through The Journal.

RED ROSE TEA

"is good tea"
You must try **RED ROSE ORANGE PEKOE**. A little higher price than other teas, but a real difference in quality. Now packed in **Aluminum**.

The Message Of The Bells

Canada, which in its sixty years as a confederated Dominion, has established more than one world record of worthy achievement, placed asthore to its credit on the anniversary of its Diamond Jubilee when, through the greatest linking up of radio broadcasting stations ever attempted, the ceremonies at the national capital were thrown into the air and carried to the uttermost parts of the Dominion, and listened to by hundreds of thousands of people from Prince Edward Island to British Columbia.

The achievement was not only spectacular but well worth-while. Direct from the Houses of Parliament, over a network of telegraph and telephone wires, to a total of twenty-three broadcasting stations, the message of His Majesty the King and the nation's leaders were carried, interspersed with the singing of patriotic songs, great choruses and the thrilling tones of the bells of the wonderful carillon installed in the Victory Tower at Ottawa.

For the moment the farthest east and the farthest west, and all the intervening territory, was in instant and common communion. Distance was annihilated, geographical barriers rendered of no account. The heart throats of the nation, soundless in the national capital, were heard and felt throughout the length and breadth of the land. It was a union in spirit and sentiment, as well as in fact, undreamed of by the Fathers of Confederation.

Amazing as an engineering feat, it was still more wonderful as a demonstration of the national unity of the Canadian people. It was an unanswerable reply to all those doubting souls who have declared that, with its complexity of racial, religious, geographical and economic problems, Canada could never become a united people. Canadians everywhere felt a thrill of national pride as they listened to the message of the bells from their national capital.

The message of the bells was, however, not for Canada alone, but for the whole world. The inscription on the largest bell reads: "This carillon was installed by authority of Parliament to commemorate the Peace of 1918, and to keep in remembrance the service and sacrifice of Canada in the Great War," while around the rim of the bell are the words: "Glory to God in the Highest and on Earth Peace, Goodwill toward men."

In the Great War, Canada fought not for herself alone, but for all the world, for the maintenance of civilization and liberty everywhere, for justice and the right. In the great Victory Tower from which the bells ring out their message is located the Peace Memorial Chamber wherein on an altar rests the Book of Remembrance containing the names of the more than sixty thousand Canadian soldiers who made the supreme sacrifice for Canada and the world. It is a great monument, not to war, but to peace.

In his beautiful description of the Tower, the Memorial Chamber, and the carillon, Premier Mackenzie King emphasized the idea underlying it all, and in its concluding words, after referring to the Angel's song to the shepherds: "Glory to God in the Highest and on Earth Peace, Goodwill toward men," he said: "Back to the skies it returns at noon today, not the echo of a mystical strain heard on a Judean moor, but the voice of a nation in thanksgiving and praise which will sound over land and sea to the uttermost parts of the earth."

That is the Message of the Bells—a message from this young, virile Dominion to all faiths and peoples, a message of Peace and Goodwill.

That is the Message of the Bells—a message run out from their national capital to the people of Canada, a message calling them to continued patriotic service to a Canada at peace at home and with the world, a message urging the cultivation of a spirit of goodwill to all, a message from the bells in which let it be hoped, all old suspicions, rancors, and feelings of ill-will will be silenced and all racial, religious and political frictions dissolved.

That is the Message of the Bells—a message to all who make Canada their home, irrespective of the land of their birth, to render deep devotion, patriotic service and, when needed, self-sacrifice to the Dominion, to show goodwill each to his neighbor, to co-operate together for the common good and the future peace, progress and prosperity of Canada.

Town Runs On Radio Time

All clocks in Nymboldia, Australia, are now set according to radio time. The local schoolmaster gets it through the school receiving set as it is given every hour by a general broadcasting company. He then rings the school bell, the classes are started on radio time, and the townspeople regulate their clocks according to the bell.

Aviation, Field For Lethbridge

Lethbridge is to have an aviation field available to commercial flying and aerial mail. The site is in North Lethbridge south of the standpipes and is sufficiently broad to allow of ten aeroplanes flying abreast. The location of six harbors follows the Federal Government's encouragement of aerial navigation for commercial purposes.

Canada's Telegraph Lines

Canada's first telegraph line was erected in 1846-7 between Toronto, Hamilton, St. Catharines and Niagara. Today there are 254,000 miles of telegraph wire in Canada. They handle over 15,000,000 messages, from which the revenue is over 11 million dollars. In addition, six transatlantic cables have a terminus in Canada, and handle nearly 6,000,000 cablegrams annually.

Lotus seeds, believed to have been buried under layers of peat more than 500 years in Manchuria, have been made to grow in a laboratory.

Even the man most anxious to please can no longer say that a woman's clothes suit her down to the ground.

Scarcity Of Beef Cattle

Reported That There will Be a Cattle Shortage in Saskatchewan This Year

A scarcity of beef cattle is likely in Saskatchewan this year, the experts say. The United Farmers of Ontario are reported in the market for a thousand carloads, as compared with 200 last year, and the opinion of cattle men is that Saskatchewan may not be able to furnish even the small complement sent out last year. Up to the end of April Canada exported 8,000 head of cattle to Great Britain, compared with 29,000 last year, while her shipments to the United States for the same four months are 106,000 compared with 32,864 for the same period last year.

Agyony of Lumbago

Quickly Soothed Away By "Nerviline"

For the sharp, piercing pain of Lumbago, and the torturing aches of Rheumatism, no agent is so efficient, so quick to bring comfort and relief as good old "Nerviline." This wonderful liniment penetrates through the tissues very quickly, strikes at once to the core of the pain, draws the blood from the congested area, and thereby relieves the pain in a short time. Those who suffer from stiff joints, swellings and Rheumatic conditions should use "Nerviline," the King of Pain Destroyers. Get "Nerviline" today, 35c. at all dealers.

Historic Relic Found

Ottawa Woman Has Baggies Played At Culodden Moor

The historic bagpipes that piped for the lost cause at Culodden Moor when the defeated forces of "Donno Prince Charlie" were rallied by his strains have been located in Ottawa. Their present owner, Miss Frances Nolin, has already refused an offer of \$1,000 for them from a Scottish museum. The pipes were first used by the late John Brown, descendant of the John Brown who played them at Culodden Moor, piped a tune when King Edward VII. then Prince of Wales, laid the cornerstone of the old Parliament Buildings at Ottawa.

THIN, WATERY BLOOD ALWAYS DANGEROUS

If Not Corrected Serious Results Sure to Follow

In no trouble is delay or neglect more dangerous than in anaemic, thin, watery blood. It is the danger to young girls and in persons who are overworked or confined with doors. It makes them unable to steadily a manner that it is often well adapted before the trouble is recognized.

But taken in time the tonic treatment through the use of this wonderful "Pink Pills," so enriches the blood that good health and strength is speedily restored. It is a cure for anaemic conditions. By Dr. Williams' Pink Pills is as certain as any thing can be. Mrs. M. J. T. Davis, Dunbar, Va., is one of the many anaemic sufferers who has found new health through the use of this medicine. She says: "I cannot express too warmly my thanks for what Dr. Williams' Pink Pills have done for me. I was suffering from a bad run-down condition. I was very nervous, had little sleep and would feel tired out at the least exertion. In this condition I began taking Dr. Williams' Pink Pills and before using them very long found myself gradually improved, and under their influence I was enabled to steadily and vigorously work. For this reason I earnestly advise my friends to take these pills, feeling sure that they will be for others what they did for me."

Send your name and address to The Dr. Williams' Medicine Co., Brockville, Ont., and they will mail you a useful little book on "Building Up the Blood." The pills can be obtained through any druggist or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

To Conduct Geological Survey By Airplane

Research Work in Saskatchewan Will Occupy Three Years

Aeroplanes and seaplanes are being employed in a three-year geological survey of Saskatchewan. It is known that the province, particularly to the north, contains vast undeveloped mineral wealth, and resources will be concentrated upon that region. The machines draw supplies of gasoline and oil from convenient centres, and the skemen, as a preliminary, make maps of little known or unknown territory. These maps are handed over to geologists, working in consultation with the skemen, and in turn the geologists are followed by expert prospectors. When the work is completed, the authorities will, for the first time, be in possession of authentic maps of Saskatchewan's northernmost reaches.

In a Missouri town of 1,800 there are 25 couples who have celebrated their golden wedding anniversaries, while four couples have been married 60 years or more.

Canada Colonization Association

Col. J. S. Dennis Tells of Work Being Carried On

Col. J. S. Dennis, Commissioner of the Department of Colonization and Development, Canadian Pacific Railway, gave a very interesting address at Winnipeg recently, in which he outlined the work that is being carried on by this organization. He produced figures showing that a vast amount of work has been accomplished since the inception of the undertaking in 1919. The total value of the land and equipment colonized to date amounts to approximately \$25,000,000, of that amount \$16,000,000 represents the land, \$3,000,000 is represented by chattels, and \$1,000,000 additional buildings provided by the land owner. "We have spent a considerable time to endeavor to find out what was the actual value of an agricultural family to Canada," said Col. Dennis, "and we are able to show from government returns that the value of a family, consisting of five, to the mercantile and industrial life of Canada amounted to \$1,583 per annum, that is covering a budget of what they need in the way of clothing, shoes, etc. We also want to show how much to find out what a family of the same size is worth to a transportation company, and we ascertained that a family of five adjacent to a railway, whose budget was the amount I have mentioned amounted to \$716 per annum in transportation."

"It is a matter of simple figuring and does not need any mathematical to make it perfectly clear to the layman. The interests of Canada that the results will ultimately be if we increase the movement of our agricultural families from the small numbers we are able to get to a vast number."

The smaller places particularly in the West have a big interest in this, because every 10 families mean to the merchants in that town \$15,000 per annum for supplies which the merchant farmers. The question of what it means to the transportation companies appeals very strongly to the executive of both railways, because we have these two companies recruiting the people that we can show, placing them on the land, and giving them attention after we get them here. These departments are costing the railways large sums of money, and I do not think it is unfair to say that the people of Canada as a whole do not appreciate what this means to them in immediate returns. It is true we obtain the benefit derived from the transportation of these people, but this is a small thing compared to the benefit to Canada generally."

"We have compiled figures, which show that the C.P.R. expended \$70,000,000 in colonization and development of Western Canada, and that sum is in excess of the total sum which has been expended by the Dominion Government and further considerable expenditures are being made in a direct effort to speed up the movement of desirable colonists to Canada for developing the unproductive land, of which a very considerable proportion will bring no direct returns to the Canadian Pacific Railway."

The cheapness of Mother Graves' Worm Expeller must not be taken to mean that it can be got at any druggist.

India Provides Remedy
Oils Extracted From Tree Seeds Used in Treatment of Leprosy
It is a notable fact, says an article in the Times of India, that India, which is believed to contain one-fourth of the leper population of the world, also provides the material from which has been derived the most potent remedy for that fearful disease.

It is simply another proof of the wisdom of nature in placing a remedy contiguous to every disease. It is from the seeds of trees growing in Assam and in South India that the oils are extracted, from injecting solutions of which Sir Leonard Rogers proved that the disease could be most successfully attacked.

Thirty-five Years Making Toy
After 35 years' effort, Charles W. Aldridge, of Battersea, England, has just completed a doll's house in a match box. The house contains four rooms, and is perfect in every detail, even to shelves, pictures on the walls and coverings for the tables. A tiny doll, mistress of the diminutive home.

Bacteria taken from a Roman vault that had been closed for 1,500 years are said to be found to be perfectly capable of germination.

Large amounts of pills in the harbors of both the Atlantic and Pacific coasts are ruined each year by wood borers.

W. N. U. 1689

WHEN USING WILSON'S FLY PADS READ DIRECTIONS CAREFULLY AND FOLLOW THEM EXACTLY

There is only one way to kill all the Flies

This is it—Darken the room as much as possible, close the windows, raise one of the blinds where the sun shines in, about eight inches, place as many Wilson's Fly Pads as possible on plates (properly wetted with water, but not flooded) on the window ledge where the light is strong, leave the room closed for two or three hours, then sweep up the flies and burn them. See illustration below. Put the plates away out of the reach of children until required in another room.

The right way to use Wilson's Fly Pads

London's Tribute to Canada

Daily Mail Says Dominion is "Nation Under a Noble Soul"

Under the caption of "A Nation Under a Noble Soul," The Daily Mail chief editorial referring recently to the Confederation Jubilee celebrations in Canada said: "The most fortunate from the British standpoint is that owing to the combined influence of the low and low birth rate in Great Britain the British proportion of immigrants seems destined to decline."

"It was never true that the happiest states are those which have no history and in the last 50 years the Dominion has helped to make history, and has influenced world events. Statements originated the idea of imperial realization hereafter when the British people discover the peril of our-sided free trade."

"The Canadian monument at Vimy Ridge will remind men for centuries of what Canada did in the Great War and how, in the hour of battle and sudden death, she was not unfaithful to the call of honor and love."

"The Dominion today has given proof that she sets the ideal above the material and is a nation with a noble soul."

Uae Miller's Worm Powders and the battle against worms is won. These powders correct the morbid conditions of the stomach which nourish worms, and these destructive parasites cannot exist after they come in contact with the medicine. The worms are speedily evacuated with either refuse from the bowels. Soundness is imparted to the organs and the health of the child steadily improves.

Simplified Spelling

As a result of 20 years' effort by the simplified spelling board of America 12 of the 20,000 respelled words contained in the handbook of this society have been entered in some English dictionaries. They are: the, there, through, about, thorough, program, catalog, decimal, pedagogic and prolog.

Minard's Liniment for warts and Pimples.

The gallop, or flying lemur, a native of Indian archipelago, is said to be the champion jumper of animals, clearing about 200 feet on an inclined plane.

Ruth—"Don't let father see 'e kisten' me."
Reuben—"I 'ain't kisten' 'e."
Ruth—"Oh well, I thought I'd tell 'e in case."

Canada's Greatest National Romance

Old Pioneering Miner Discovered Placer Gold in Klondyke

The discovery of placer gold in the closing years of the last century, on the Klondyke River, a tributary of the mighty Yukon, was Canada's greatest national romance. The credit for the Yukon's discovery is now generally given to Robert Henderson, an old pioneering miner, although Cornack, who was luckier than Henderson inasmuch as he made a fortune, whereas Henderson did not, is sometimes mistakenly mentioned as the discoverer.

The news of the discovery of June, 1896, filtered out to the world, and in 1897 the rush started. Some tried to reach the new camp, overland from Saskatchewan and Alberta, and, doomed in numbers and shattered in health, reached the northland after a year of hardships. Others proceeded from Seattle and Vancouver fifteen hundred miles up the Pacific to Ilyas and Skagway, crossed the Chilkoot Ranges on foot and floated five hundred miles down the Yukon on improvised boats and rafts.

Canada has reason to be proud of her Yukon administration. The Royal Northwest Mounted Police, as the force was then called, was early on the scene and policed the country in a manner that gave safety and stability to the new camps.

One of Richest Nations
Since 1913 Canadians have increased their holdings of their own Government and municipal bonds by over \$2,582,000,000 or sevenfold. Canada's per capita wealth is now exceeded only by that of the United States and Great Britain.

Minard's Liniment for insect bites.

Trees That Attract Lightning
Pine, oak and spruce are the trees most subject to lightning stroke, while beech is nearly immune, according to a European survey. In the American West, 75 per cent. of trees hit are western yellow pine and Douglas fir.

COMMISSION ON CUSTOMS HAS ENDED LABORS

Charlottetown, P.E.I. — The Royal commission on customs has concluded its labors for the time being.

Sittings here marked the close of a tour which, opening last November, has covered all the provinces of Canada. Customs administrations, commercial smuggling, petty smuggling, operations of breweries and distilleries, and last, but not least, smuggling of liquor into Canada and the United States, have been gone into during months of sitting. Now the commission with a mass of evidence and exhibits taken en route, will return to the last of August or early in September.

Sittings in Ottawa and a trip to Washington to consult with the United States authorities on the operation of the Anglo-American treaty will complete the activities of the commission prior to completion of a report for the Government and Parliament. This will be available for the next session of Parliament. The commissioners left today for their respective homes. Chief Commissioner J. T. Brown is returning from here through Cape Breton and then to his home in Regina.

Sask. Rifle Association

Annual Prize Meeting to be Held at Regina.

Regina.—The annual prize meeting of the Saskatchewan Provincial Rifle Association is to be held at the rifle range in Regina on July 19, 20, 21, and 22. A comprehensive list of events has been prepared for the meeting, for which a large number of entries is anticipated. From all parts of the province of Saskatchewan riflemen will come to Regina to attend the "shoot."

From the participants in the Regina meeting the provincial team, of about 16 members, will be selected by the council and called upon in the order of their scores in the greatest aggregate to attend the prize meeting of the Dominion Rifle Association at Ottawa in August. At the Ottawa meeting members will be selected to represent Canada at Bisley, England, next year.

Special provision has been made in the program for the tyro in shooting matches. The "tyro" is defined as any member of the association who has not at any previous national, dominion, colonial, county or provincial rifle association meeting, won a prize other than a tyro prize except in team matches or extra series.

For the competition, prize a camp is to be pitched at the rifle range and a canteen is also to be operated and meals are to be provided at the range. Prizes to the value of \$1,000 are included in the long list prize published, as well as medals and cups.

Will Survey Proposed

Construction Plans

Chief Engineer of C.N.R. Also inspecting Hudson's Bay Line Work. Winnipeg.—C. G. Caswell, of Montreal, chief engineer of construction for the Canadian National Railway, is on his way to the northern part of the province where he will inspect work on the Hudson's Bay Railway and survey proposed construction plans. Mr. Caswell before his return to Winnipeg will inspect all new branch lines either proposed or now under construction of the system in Northern Saskatchewan and in Peace River area of Alberta.

Sale Will Not Be Rushed

Winnipeg.—No action will be taken on the beer referendum results until the official returns have been received from all constituencies of the province, said Premier J. Bracken on his arrival here from his annual visit to the Brandon fair. Whether the result would demand a special session or not the Premier was not prepared to say.

Freight Rates Reduced

Moncton, N.B.—Freight rate reductions between the Maritime provinces and central Canada as provided for by Parliament at the last session when the report of the Duane Royal commission was largely implemented by the Government are now in effect, the tariffs having been issued July 1.

To Entertain British Editors. Ottawa.—Officials of the Dominion Government have been entertaining a group of 100 British newspaper publishers and editors representing various provincial newspapers, in August.

W. N. U. 1689

Expedition Has Gone To Hudson Strait

Canada Will Set Up Aerial Bases in Northern Regions

Ottawa.—The government's aerial expedition has gone to Hudson Strait. It is proposed to establish three aerial bases, one in the vicinity of Port Burwell, at the east end of Hudson Strait, one in the vicinity of Nottingham Island at the West end of the strait, and one in the vicinity of Big Island on the north side of the strait, about midway between the two. The distance between Port Burwell and Nottingham Island is 500 miles, Hon. C. A. Dunning in receiving the airman said: "It is the policy of the government to provide for the development of the best port on the bay in order that all the resources of the territory adjacent to and surrounding the bay may be exploited and developed. Secondly, it is the intention of the government to provide, so far as the facts which will determine will permit for ocean navigation from a port on the bay to any other part of the world."

Farm Area On James Bay

Has Some Prospects As Peace River District Says Professor

London, Ont.—According to Prof. J. W. Russell, head of the Department of Geology of the University of Western Ontario, "500 miles due north of London lies, in the district known as the James Bay, extending from the shores of the James Bay inland about 125 miles and covering an area twice that of Western Ontario, the greatest settlement, agricultural and population possibility in Northern Ontario. It is one of the two great population possibilities in Canada, the other being the Peace River district." Prof. Russell said that the James Bay has the characteristics of Western Ontario pre-settlement days.

Hon. Robt Takes Vacation

Says Finances of Country Are in Good Condition

Quebec.—"I am not going to Europe to negotiate a treaty with Germany and I will only visit France and England," declared Hon. J. A. Robt, on board the "Empress of Australia," which sailed for Cherbourg and Southampton. Mr. Robt declared he needed a rest after strenuous work at Ottawa.

"I am going," he said, "to leave the finances of the country in fine position. We have the money sufficient to meet our requirements and I will return in August."

Dicoovers Process

For Making Gold

French Scientist Claims He 'Has Solved Problem'

Paris, France.—Professor Joliot, French scientist, claims to have solved the problem of the ages—the transmutation of silver and other base metal into gold. He says he has succeeded in getting 20 milligrams of gold from a culture of silver metals, including six grammes of silver. He believes that considering the cost of the agents employed the process will have great industrial value.

Measuring Heat Of Stars

Delicate Instrument Is Being Used to Conduct Experiments

Washington, D.C.—Flier's wings form part of a delicate instrument which will be used by Dr. Charles G. Abbott of the Smithsonian Institution for measuring the heat of stars. Dr. Abbott has gone to Mount Wilson, California, to conduct his experiments.

The radio meter is so sensitive that it could measure the heat of a match 5,000 miles away if no atmosphere intervened, the scientist said.

Farmers Lose Heavily

Edmonton, Alberta.—More than nine thousand acres of hay land in the area of Big Lake, lying between Edmonton and Lac Ste. Anne, have been inundated and the hay crop destroyed at an estimated loss of \$30,000 to the farmers, owing to the flooding waters of the Sturgeon river, according to A. M. Kirkpatrick, government engineer, who has returned to Big Lake, Lac Ste. Anne and Wabanan districts.

Returning In Airplane

Paris, France.—Charles A. Levine, who accompanied Clarence Chamberlain in his flight to Germany, intends to fly back to New York as soon as he can find a French pilot to go with him. He made this declaration at a luncheon given by the American and British correspondents here.

Coast Cities Sponsor Flight

Two B.C. Aviators Anxious To Try

London, to London Trip. Vancouver, B.C.—F. Turner is the second British Columbia aviator who has applied to make the proposed London, Ont., to London, Eng., flight. It was announced, E. A. Mowat, New Westminster, formerly of Regina, was the first.

Turner, who served two years overseas in the flying corps, has asked the promoters of the flight that he wishes to make the trip alone. He has met Mayor Louis Taylor to discuss the possibility of his effort being backed by the city. New Westminster has already sponsored the application of Pilot Mowat.

Mayor D. R. McLaren, president of the air force club of British Columbia, has announced the club would be behind any sound project for a flight from Canada to England.

Will Use Canadian Readers

New Brunswick Has Prescribed Series For Use in Schools

Fredericton, N.B.—The New Brunswick Board of Education has prescribed the series of Canadian readers for use in the schools of the province. Nova Scotia is to adopt the same series shortly and Prince Edward Island will do the same. It is expected that British Columbia, Alberta, Saskatchewan and Manitoba already use the series. With the Maritimes adopting it seven out of the nine provinces will have one series of reading books in the schools.

TO CLOSE MANY SMALL PORTS OF CUSTOMS ENTRY

Ottawa.—The closing of a lot of small ports of customs entry throughout the country will have to be tackled soon by Hon. W. D. Fisher, Minister of National Revenue, and the action which is projected seems likely to cause some trouble.

The special committee of the House which last year began the inquiry into the customs administration recommended among several things, decrease in the number of customs posts and some of the commercial bodies previously had suggested the closing of many small ports. The loss from the operation. There is one case where the collections last year were only \$30. Nevertheless, a committee that has a customs house in its midst regards it as a sign of status and will not readily relinquish any such service. It is believed any reforms in this direction will be effected with caution as smaller the port that is closed, the louder is likely to be the consequential protest.

Meanwhile in the re-organized preventive service, this is the busiest season. Smuggling and bootlegging are done mainly in the summer. The enlarged service is at work and new motor cars and motor boats are being delivered, while light but fast cruisers are under construction. The number of seizures has greatly increased this year and has resulted in a remarkable growth in revenue. Sales and excise taxes are conspicuous factors, while liquor bootleggers heretofore making small contributions to revenue are now taking in very substantial amounts. Mr. Cavan, chief of the preventive service will leave in about a week to attend to the final re-organization of the staff in the western provinces.

Senior Golfers to England

Canadian Senior Golfers photographed just before sailing recently on the Canadian Pacific steamship Montserrat for Great Britain, where they will meet international veteran golfers in a series of matches. The players are from left to right in the back row, F. J. Mackay of Sarnia; Ralph George Garman of Quebec City; Dr. B. Buchanan, Galt; and J. D. Fraser of Toronto. Those sitting are C. Y. Stanger of Winnipeg; Mrs. F. A. Parker; George R. Lyon, 48-year-old veteran who will captain the team, George C. Heintzman and Dr. W. M. McGuire, all of Toronto.

U. S. ADJUSTS DIFFICULTIES OF BORDER RULING

Washington.—The recent negotiations between the Canadian legation and the United States Department of Immigration have resulted in clearing up some points in the border crossing regulations. The regulations were the subject of international discussion when the Labor Department imposed new regulations affecting Canadians living in the Dominion and working on the American side of the border.

One important point is the status of Canadians who comply with the head tax and visa regulations, thereby qualifying technically as immigrants to the United States. Immigration experts have ruled that these immigrants may consider themselves to enjoy the better crossing privilege without further payment of fees or renewal of passports, except that periodic inspection is proposed of commuters' permit cards, probably every six months.

Even if commuters, change their place of employment in the United States, they will not be subject to challenge. Also, they may discontinue commuting for a reasonable period and re-commence under their old status provided they do not contravene any of the fixed clauses of the United States Immigration Act. Another important phase of the new regulations has been clarified with the assurance of the Labor Department that Canadians may qualify as commuters in the future. Some phrasing of the order raised a doubt as to whether Canadians not already commuting when the order was issued would be able to enter the United States daily to work on that side of the border.

Sending Dogs To Arctic

Eight Specialty Trained Huskies On Way to Coronation Gulf

Vancouver, B.C.—Having completed nearly 1,000 miles of a 3,000 mile journey, a team of eight husky dogs arrived here from a point near Arnhem, in Northern Ontario. They are bound for Coronation Gulf in the Arctic. They embarked on the steamship Haychimo which sailed July 7.

The dogs are consigned to the Incorporated of the Hudson's Bay Company at Coronation Gulf and are a specially trained team, developed for stamina and long distance pulls.

Will Try For Altitude Record

Chamberlain Expects to Keep Plane Aloft Over Sixty Hours

New York.—The Bellanca monoplane, Columbia, in which Clarence Chamberlain and Charles A. Levine flew to Germany, will be used by the same aviators as soon as it is brought back from Europe in an attempt to break the world's endurance record. Joseph May, secretary to Levine, said increased time is expected to keep the plane aloft for more than 60 hours.

Cattle For Canada

Montreal.—The Canadian Trade Commissioner at Bristol reports the formation by the South Wales and Monmouthshire Cattle Importers' Association, Limited, whose chief purpose is the direct importation of Canadian stock and fat cattle. This new group represents nineteen meat traders' associations in the region indicated.

Settling British Boys On Canadian Land

Governments Agree To Assist Them In Buying Farms.

Ottawa.—What is expected to be the most constructive of modern land settlement schemes is embodied in an agreement for the settlement of British boys on the land in Canada, just concluded between the British and Canadian Governments under the Empire Settlement Act of 1922. Under the scheme it is proposed to jointly expend a total sum of five million dollars over a period of ten years.

The scheme will apply to boys who have received assisted passages, have passed through the provincial training centres in Canada, and who were between 11 and 20 years of age on arriving in the Dominion.

On reaching 21 years of age, the boys—provided that they have acquired the necessary training for experience working for wages on a farm in Canada, and have saved approximately \$500—will be eligible for assistance up to an amount not exceeding \$2,500 for the purchase of a farm for stock and equipment. No advances will be made to young men over 25 years of age.

Settlement under the scheme will commence on April 1, 1924.

Prince Making Few Public Engagements

Premier Baldwin Will Carry Chief Burden During Canadian Visit

Ottawa.—There will be few actual public engagements during the visit of the Prince of Wales, from what can be learned at the present time.

Premier Stanley Baldwin will probably carry the chief burden of public appearances. During the Prince's three days in Ottawa, only Wednesday, August 27, will be taken up with official duties. His Royal Highness will at noon that day unveil the altar of sacrifice in the memorial church of the Victoria Tower.

Later he will unveil the statue of Sir Wilfrid Laurier recently erected on Parliament Hill and then visit the International Poultry congress while it is in session.

Higher Price Levels

Index Number of Common Goods Slightly Higher in June

Ottawa.—The Dominion bureau of statistics index number weighted according to the commercial importance of the 223 commodities which are included in its computation rose 1.6 points in June, being 132.5 as compared with 131.9 in May.

Vegetable products rose from 124.0 to 131.3, higher levels for grains, flour, potatoes and some fruits more than offsetting lower levels for coffee, tea, raw sugar, hay and straw. Animals and their products fell from 125.7 to 124.7, declines in livestock products, mutton and butter more than offsetting advances in hides, leather, boots and shoes, and beef.

WILL DROP PLAN FOR REFORM OF HOUSE OF LORDS

London.—Announcement in the House of Commons by Premier Baldwin that the Government's scheme for the reform of the House of Lords, which has created something of a political furor, was merely "a basis for discussion and criticism." is taken by political observers to indicate that the reform of the Lords may be dropped completely for the time being.

During the debate, which aroused parliamentary interest only as a discussion of the fate of Great Britain's upper chamber can arouse it, there was an allusion of Lord Bessborough's recent assertion in the House of Lords that the reform would be rushed through in the life of the present Parliament.

Banney Macdonald, leader of the Labor Opposition moved a vote of censure on the Government on the question of the reform of the Lords, basing his motion on the charge that the Government had received no mandate from the people for the proposed changes. The motion was defeated, 362 to 167.

The Prime Minister had to listen to criticism from Laborites. Liberals and Conservatives. In the past the reform of the House of Lords, which declined to leave "the ramshackle thing where it was."

Mr. Lloyd George, the Liberal leader, declared that in the past the reform of the House of Lords, which declined to leave "the ramshackle thing where it was."

JAPAN SUPPORTS U. S. ON CRUISER TONNAGE DEBATE

Geneva, Switzerland.—Japan indicated that she would now support the position of the United States in the Anglo-American discussion of cruiser tonnage. Japan insisted that world interests would best be served by adhering to low tonnage figures for cruisers and supporting the original bid of the United States—250,000 tons.

The British plenipotentiaries, who have been trying to get the United States and Japan to realize the need of the empire for fast, strong cruisers to protect British trade routes and British interests in the far corners of the earth, appeared to be surprised at the sudden announcement by Baron Saito that Japan would not support the position of her own fleet. Mr. W. C. Bridgman, hearing the announcement, is understood to have said: "These figures (250,000) are impossible as a basis of discussion."

This development in a dramatic fashion gave a new twist to the tripartite naval conference. It means that Great Britain, which has all along maintained her right to protect her dominions and her trade interests, is forced in her desire to have a cruiser fleet by both the United States and Japan. It may mean that the conference, called by the United States, may fall, for Great Britain may find that it is impossible for her to approve of a treaty which might endanger her world-wide lanes of communication, the arteries of her life.

Safeguard Public Health

West Has Made Great Strides In Care of the Sick

Edmonton.—Making his first visit since 1922, Hon. Dr. J. H. King, federal minister of Public Health and of Soldiers' Civil Re-establishment, was in Edmonton recently.

"Public health has made wonderful strides in Canada," said Dr. King, and perhaps nowhere more so than in Western Canada.

"Here, under pioneer conditions in the outlying districts, and rapid growth in the cities, the various public health bodies have co-operated to build up a splendid system which takes care of the sick in the cities at the same time as it reaches far into the remote districts, to bring help and succor to the man on the fringe of civilization."

Build Big Battle Plane

Huge Airplane Under Construction in United States

New York.—The New York American says a huge battle plane designed to carry five machine guns and gunners is being constructed for the War Department. The plane was designed by Anthony Fokker.

The plane with a wing spread of 73 feet, is larger than the monoplane which Commander Billy Dew flew across the Atlantic.

In addition to its machine guns the plane will have provision for carrying 3,400 pounds of high explosives with which to bombard land or sea forces. It is said.

Surgeons May Establish College

Regina.—The formation of a Royal College of Physicians and Surgeons for Canada is being considered by the medical association, according to a statement made by Dr. S. E. Moore, who has just returned from a medical convention in Toronto. It would be affiliated with the same body in Great Britain.

To Prevent Liquor Smuggling

Moncton, N.B.—An understanding has been reached by which the Canadian National Railways, the Customs Preventive Service of Canada and the United States Customs Service will co-operate to prevent the illegal movement of liquor from points in the Maritime provinces to other centres in Canada and the United States.

Peace River Trail

Edmonton.—Dr. J. A. Boscche, president of the Canadian Automobile Association, has returned to Edmonton after a trip through the Grande Prairie and Peace River country to take motion pictures to illustrate his lecture on "The Peace River Trail" which is scheduled to give at numerous points in Eastern Canada.

Canadian Post Is Dead

Victoria.—Charles Mair, the Dominion's oldest poet, and exponent of a sturdy Canadianism, died at the Jubilee Hospital here in his 87th year.

The Spirit of a Town

A town may have massive public buildings with their towers reaching to heaven; glorious parks and brilliantly lighted streets, but if it hasn't the spirit of friendliness, if its people live to themselves unmindful of the men and women around them, if there isn't some common sentiment which binds them together in a conscious pride of their own progressiveness, it isn't much of a town to live in.

They say there are certain towns down east, where retired farmers and business men are snugly settled for the remainder of their days. Life to them is in the past, interest to them is self centred. They spend their money at the distant mail order houses and grudgingly give a nicker for a

poppy on "Poppy Day." They don't care if their town grows or stagnates, as long as the tranquillity of their existence remains undisturbed. The development of music or dramatic art or literary achievement within the community is something beyond their sphere—that's the kind of a town that a red blooded man hates to live in.

Give us the town where the spirit of friendliness predominates, when the neighbour's prosperity is a matter of concern, where you don't envy the man who makes his business a success and you don't shun a man where social standing hardly measures up to your own. Give us the town to live in where there are social gatherings, where Bob knows Tom and Bill greets Dick with a smile and a cheery Hello! Give us a town where people pay their taxes even though it costs them an effort, have a kind word for the Board of Trade and gives it a boost instead of a growl. Give us a town where the people are generous and get behind every movement for the public welfare with a gusto of enthusiasm, where the people play together and study together. Give us a town which is on the best of terms with its rural friends, where they acknowledge their inter-dependence and exhibit mutual confidence. Give us a town where the children laugh and the men and women smile at each other, and if that town has nothing more than a row of wooden shanties, it's a good place in which to live.—North Battleford Optimist.

Address by Bro. P. Locke (Continued from Page One)

time. A year ago they were with us and like us they joined in the fitting ceremony of devotion to the memory of those who have gone over. After another year there are other vacant chairs, our circle is again broken, our brethren are gone, our lodge room is draped in sable weeds and when we ask for our absent ones, we bow our heads in sorrow as the mournful dirge rings in our ears, telling us that the silver cord is loosed and the golden bowl is broken. Would that we could do justice to their memory and properly express the high need of praise so justly their due. We can only say:—

None knew them but to love them, Nor named them but in praise.

How frail the tenure by which human life is held, how often we witness the abrupt termination. All nature tells man the story of dissolution on every page her volume is illustrated. In every form it is presented to view and pressed home upon us in every manner. May the memory of our brethren be waited to us through the medium of this annual ceremony, their voices sweet with the tunes of brotherly love. Strong in the power of truth, guide us always in the path of right. May we through memory's medium feel again the fraternal grasp, catch support to faltering footsteps, have good counsel whispered into our ears, and withal, may it help us to walk the way of duty. Duty is a broad, clear and beautifully embellished way, with shade and flowers and air fragrant with perfume. It leads through all the chambers of our mystic circle where we are taught the lessons on how to live. May it also teach us that other great lesson "How to Die."

For well we know,
'Tis not the whole of life to live,
Nor all of Death to Die.

Brethren, what we know and hold most dear in our hearts of those who are gone was produced by fraternity, it gave them their opportunity and ministered into their development.

Their faith, their hope, their conquest. Their final victories is to us a perpetual inspiration. Their message to the Order today would be to go on and make the Order of the future grander and of greater service than the Order of their day and in that spirit of memorial exercises let the whole membership partake.

By this ceremony may we write upon our hearts loves greatest token and cherish always those virtues by which their life among us was made fruitful. May their memory never die, and so may fraternity live always to bless mankind.

Historical Review of Confederation

Fathers of Confederation Encountered Stiff Opposition in Struggle for Uniting Canadian People

Herewith is published instalment No. 2 of the Diamond Jubilee address by Mayor Burns to Coleman school children dealing with the Quebec conference and its acceptance by most of the Canadian provinces.

On the morning of October 10, 1864, in the Parliament Building of Quebec, the most remarkable and historical meeting ever held in British North America was opened. Delegates from Upper and Lower Canada, Nova Scotia, New Brunswick, Prince Edward Island and Newfoundland assembled together for the first time. Thus was opened a convention whose deliberations were to have a marked bearing on the future of British North America. Strange as it may seem to us nowadays no record of the proceedings of this historical gathering were set down in detail, even their discussions were held in private, and perhaps it were better so, for many delicate and confidential matters were debated which might have become subjects of public and political controversy had they been published in the papers of that time.

Slowly, loyally and patiently those earnest men built up a new constitution for a new Dominion, as they sat within sight of the Plains of Abraham, and the mighty St. Lawrence river, where for centuries past the representatives of France and of England had fought in deadly combat for the possession of this great and rich domain. Little wonder is it that we feel in this Diamond Jubilee year, a sense of awe and reverence for those earnest men who in 1864 assembled to lay for us the enduring foundations of our wide Dominion. Confronted with almost insurmountable difficulties, handicapped by widely different sentiments and many conflicting claims, they strove with one accord to embody the greatest good (continued on next page)

for the greatest number, with justice
and freedom for all.

Among the outstanding and con-
spicuous figures of the gathering at
Quebec mention must be made of
McDonald, Cartier, Brown, Galt,
McGee, Tupper, Mowat, and the
chairman, Tache, yet John A. Mc-
Donald was recognized by everyone
to be the ruling genius of Confed-
eration, and never for a moment
did he lose sight of the great issue
involved.

It was inevitable that some mis-
takes should be made, some mat-
ters overlooked, for those men were
as human as we are. Yet after
nineteen days of earnest consultation
they were able to agree upon their
momentous conclusions that were
embodied in 72 resolutions covering
all phases of Federal and Provincial
governments. These included such
important matters as transportation,
taxation, representation, financial
awards, judicial laws, means of de-
fence, constitution, education and a
host of other important regulations.
These are difficult subjects for
young people to understand. I
know they are equally hard for
grown-ups too, yet they were all
necessary for the welfare of Canada
and the upbuilding of this spacious
Dominion of ours.

At the conclusion of the Confer-
ence on October 28, the delegates
visited a number of other cities in
Canada, to make speeches and be-
come acquainted with each other be-
fore returning to their own provin-
ces, where the result of the Quebec
meeting was taken up by their re-
spective governments. The res-
olutions embodied at Quebec were
passed by a large majority. In
New Brunswick the terms of Con-
federation were only agreed to after
a general election had been held.
In Nova Scotia the Quebec res-
olutions were passed in the face of
stern opposition on the part of Jo-
seph Howe, Charles Tupper how-
ever giving his unstinted championship
and support. Prince Edward Is-
land refused to ratify the agreement
entered into by the delegates, and
for the time being withheld its sup-
port. Newfoundland withdrew en-
tirely from any further part in Con-
federation and still remains outside
of the circle of the Dominion.

Wild Animals Friendly on Banff-Windermere Highway

MAMMA
BEAR AND KIDS,
LAKE LOUISE

CINNAMON BEAR NEAR BANFF

BOZO BEAR TRAFFIC COP

"The Friendly Road," by David
Grayson, which is well-known to
many lovers of nature, depicts in-
cidents and friendliness of people
along country roads and in the rural
districts. There is, however, a road
in the Canadian Rockies the friend-
liness of which is not due to mortals
as in Grayson's book, but to the
friendliness of animals. Animal
termed wild, but in this instance a
word that cannot be applied to these
on the Banff-Windermere Highway.

There is possibly no more beau-
tiful road than this which runs from
Banff to Lake Windermere. In the
Columbia River Valley. The distance
of 104 miles is spectacular and the
scenery is constantly changing. The
views from the high passes looking
down into valleys, thousands of feet
below, they lakes surrounded by al-

pine meadows, rivers crossed and re-
crossed, and glimpses of cascades
tumbling down slopes from dizzy
heights are intriguing and beau-
tiful.

To this natural beauty is added
that of seeing the animals in their
natural haunts. Rocky Mountain
sheep are seen on the road along
Vermilion Lakes not far from Banff.
They are so tame that often motorists
have to slow down as they will per-
sist, almost to the point of danger,
in standing in the middle of the
highway.

Bozo, a black bear, is a friend to
many motorists on the Banff-Win-
dermere road. He comes out on the
highway as if he had sole right to
it. He does not resent these invad-
ers in the least and really wishes to

show his friendliness. Sometimes he
has lunches handed to him and the
remarks of "nice old chap, fine old
fellow," please him tremendously,
and he will try to come even nearer.
Bozo no doubt had many dreams
during the winter of summer tour-
ists, and possibly has figured out in
true bear fashion just how to get
the most out of the tourist season.

Deer are seen, also, on this famous
highway, though not as often as
other animals. They are regular vis-
itors to Banff and are frequently
seen on the streets of the village.
There are hundreds of miles of
smooth motor roads through the
Canadian Rockies, and devotees of
the open road are visiting this re-
gion in increasing numbers, num-
bers in the least and really wishes to

Nova Scotia Noted For Its Hunting Facilities

BIG BULL,
NOVA
SCOTIA

CALLING
MOOSE

BEAR ARE PLENTIFUL
IN NOVA SCOTIA

Reports of excellent big game
hunting in Nova Scotia this season
have been received at the tour-
ist department of the Canadian Pa-
cific Railway in Montreal. Hunters
have returned with tales of super-
moose, seemingly endowed with
more than usual cunning, thus add-
ing to the interest in this sport. A
large section of the interior is a
maze of beautiful lakes, woods and
streams where moose are plentiful
despite the fact that about 1,200
bulls are killed by hunters each year
between October 1st and November
15th, the open season. Cow moose
and young calves are protected.
Water approaches to the hunting
grounds are but a short motor-ride
from Digby and Annapolis Royal on
the Dominion Atlantic Railway.
Many hunters penetrate the wil-
derness by canoe from south Miramichi
at the head of the Liverpool chain
of lakes, or by motor truck which

transports hunters, guide and fuel
and canoes to Kegonsakoo and other
haunts of the moose. Some of the
best guides are the Micmac Indians,
there being also plenty of efficient
white guides at Del Thomas's South
Miramichi Camp and Kegonakoo.
But one bull moose may be bagged
each season by a hunter. The
majority of moose are killed each
year in 13 of the 18 counties. Moose
and caribou are plentiful on Cape
Breton Island but the hunting of
these animals at the present time is

prohibited on the island. Bear and
wildcat, for which there is no closed
season, roam the woods of Nova Sco-
tia. Ruffed grouse, woodcock, snipe,
wild geese and many other varieties
of small game are plentiful and af-
ford the hunter every opportunity
of an excellent hunting holiday. The
province too is a mecca for the angler.
The many streams and lakes
abound with salmon and trout. Off
the coast tuna, cod, haddock, pollock
and flounder fishing is extensively
indulged in.

WORLD HAPPENINGS BRIEFLY TOLD

Building permits for Greater Vancouver during the first six months of this year totalled \$10,861,008.

Frederick J. Ducombe, former Vancouver mayor, has donated to the province his large residence as a home for incurable leprosy.

Viscountess Harcourt has been appointed chairman of the council of the Society for Overseas Settlement of British Women in succession to Countess Duxton.

The new \$5,000,000 pier of the Canadian Pacific Railway was officially opened as a feature of Greater Vancouver's celebration of the diamond jubilee of Confederation.

Three hundred designs have been submitted in the contest for the best design for the issue of silver coins which will commemorate the Diamond Jubilee of Confederation.

Officials of the Dominion Government will entertain a group of 100 British newspaper publishers and editors, representing various provincial newspapers, in August. The party arriving at Quebec August 12, will travel from the Atlantic to the Pacific Coast.

Serious depletion of North Pacific halibut is reported by J. F. Babcock, chairman of the International Halibut Commission. Mr. Babcock said the commission would meet fishermen and all interested in halibut next fall, and then frame an interim report to the Canadian and United States Governments.

Excellent for Groupy Children.
When a child is groupy with cramp it is a good plan to use Dr. Thomas' Electric Oil. It reduces the inflammation and because the pilsen driving speedily relief to the little sufferer. It is equally reliable for sore throat, colds, earache, rheumatic pains, cuts, bruises and sprains. Dr. Thomas' Electric Oil is treasured by many thousands as an indispensable of the family medicine chest.

Co-operative Marketing of Livestock
The Province of Saskatchewan now has an organization for the co-operative marketing of livestock. The Saskatchewan Livestock Pool came into being on June 1st and in two weeks' time 1,258 contracts were received. Southern Saskatchewan shipments will be marketed at Moose Jaw and northern ones at Prince Albert.

No man or woman should hobble painfully about because of corns when so certain a relief is at hand as Holloway's Corn Remover.

Shows Rapid Progress
It was only 11 years ago, the last spike was driven in Canada's first transcontinental railroad. Only 30 years ago, the first gold was found in Klondike. Only 20 years ago, two of her great Provinces Saskatchewan and Alberta were created.

The first railway in the United States was in Boston in 1827, having wooden rails.

Invents Sea Rocket
Will Carry Passengers Across Atlantic at Terrific Speed Says Professor Robert H. Goddard.

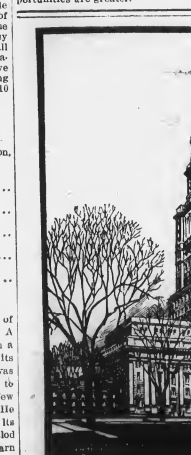

Professor Robert H. Goddard, of Worcester, Mass., internationally famous physicist, experimenting in his Clark University laboratory with the high of a giant passenger-carrying rocket, having some features of the aeroplane, which will enable man to thunder in the air across the Atlantic at a rate of speed so terrific that the flight of Luedberg, Chamberlain and Byrd will seem slow in comparison.

"This is no idle dream," he said, "but an actual scientific possibility. The idea of combining rocket and aeroplane is an offshoot of the space rocket on which I have been working for the past eleven years. My own experiments, confirmed by scientists in Germany, Austria and Russia, prove that the space rocket, propelled by successive explosions, is capable of travelling a practically infinite distance, far enough at least to pass beyond the sphere of gravitational influence of this planet."

Drives Asthma Like Magic.
The immediate help from Dr. J. D. Kellogg's Asthma Remedy seems like magic. Nevertheless it is only a natural remedy used in a natural way. The smoke or vapor, reaching the most remote passages of the affected tubes, brushes aside the trouble and opens a way for fresh air to enter. It is sold by druggists throughout the land.

Million in Coffee Industry
There are 50 establishments with a capital investment of \$5,955,428 engaged in the coffee and spice industry of Canada, according to a recent report of the Dominion Bureau of Statistics. These have a gross annual production value of \$14,620,000. In which the value added by manufacture is \$3,012,770. Imports of commodities under this heading have a value of \$6,791,091, and the only item of export is coffee and imitations, which run to \$18,065 annually.

Boosts Canadian West
Word from Omaha, Nebraska, quotes Roger Babson, noted statistician, as telling a gathering of Nebraska farmers to sell out and go to Western Canada, where farming opportunities are greater.

Work has commenced on the second stage of a building, shown above, which when completed will be the highest in the British Empire—a truly a monument to Canadian enterprise, towering about 450 feet above the ground, with a frontage of over 400 feet on Dominion Square, probably the choicest site in Montreal. The present head office of the Sun Life Assurance Company of Canada, which architects declare to be one of the finest office buildings in the world, will be incorporated in the completed edifice, but it will only be a small unit as compared with the finished structure. The present head office is

WRIGLEYS
SPEARMINT has a tang and zest to brighten your whole day!
It keeps teeth white, soothes the throat, and aids digestion.

Monotony Can Be Overcome
Not Necessary For People To Be Slaves To Their Work

Hard work never killed anyone. Monotony has crushed the souls of thousands. Everybody has to put up with a certain amount of sameness—but that does not say that this is all we can do. After we've done all the necessary and monotonous things there is a whole heap of time left for other things—interesting, things that do not say that this is all we can do. After we've done all the necessary and monotonous things there is a whole heap of time left for other things—interesting, things that do not say that this is all we can do.

It comes to this: You can either allow yourself to be entirely swamped by your work, whatever it may be, in the home, the shop or the office, and so leave no time for anything else, or you can pack all that into a neat little compartment of its own and then get on with enjoying life.

No matter what your work is you needn't succumb to the monotony. It isn't your every-day task that prevents your doing other things, it's your lack of energy, enterprise—or just pure laziness.

Seaplanes Will Patrol B.C. Fishery Areas

Was Abandoned Two Years Ago For Lack of Funds

Seaplane patrol of the fisheries areas of the British Columbia coast will be resumed this year. It is announced. Permission to carry on the patrol here has been received by Major J. A. Motherwell, inspector of fisheries.

The aerial method of fishery protection was abandoned two years ago because of lack of funds.

The patrol will extend from the international boundary in the South to Queen Charlotte Islands and Prince Rupert district in the north.

The planes will be engaged chiefly in detecting fishing during closed periods, illegal fishing inside the Canadian boundaries and the use of long nets.

Most Populous Nation

Although there has been no census, China is said to be the most populous nation on earth. One-fourth of all the people in the world or about an equal number to the population of Europe, live in that country.

new occupied to capacity with a staff of approximately 1200 people. The completed building will provide for a total staff of over 10,000. The entire building will be erected on a structural steel frame and the exterior faced with granite, and will be of the same monumental character as the existing structure.

JULY 17

SAMUEL ANOIN'S DAVID

Golden Text: "Let no man despise thy youth; but be thou an example to them that believe, in word, in manner of life, in love, in faith, in purity."—1 Timothy 4:12.

Lesson: 1 Samuel 16:1-13.

Devotional Reading: Proverbs 3:1-6.

Explanations and Comments

1. Samuel's Mission to Bethlehem, verses 1-3.—Saul had failed to measure up to the standard of what was expected of him. Saul's failure caused Samuel great sorrow. He realized that he must take definite action about Saul's successor, that such was God's will. He must go to Bethlehem with a flask (horn) filled with oil to anoint one of the sons of Jesse as the Lord's chosen king. Yet he hesitated to go. Would not Saul kill him if he felt because known? Then a way out of the difficulty came to his mind; as a matter of precedence he would give as the object of his visit the holding of a sacrifice, and would keep silent about the more important reason for his coming. He would give one reason for his visit which was a true one, and would say nothing about another reason, which he was under no obligation to divulge.

"It was not concealment the object of which was to mislead any one, or to induce any one to do what he would not have done had the whole truth been known to him. When concealment is practiced in order to take an unfair advantage of any one, or to secure an unworthy advantage over him, it is detestable. But to conceal what you are under no obligation to reveal, when so important and is to be gained, is quite different thing."—W. G. Blaikie.

Would Honor Canadian Writers

Greater Interest in Canadian Literature Urged By Professor Allison

Continued effort to awaken interest in Canadian literature was urged by Professor W. T. Allison in his presidential address before the seventh annual convention of the Canadian Authors' Association, which began in Ottawa.

Professor Allison reviewed the work done to educate the general public in Canadian literature of yesterday and today. This, he said, was the outstanding work of the year. He called attention to the fact that although the country was celebrating the diamond jubilee of confederation, Charles Blair, "the poet who sang beside the cradle of confederation," was still alive and active.

Professor Allison urged that the idea of an annual award for the best native work of the year in either verse or prose, to be known as "the confederation prize," be pressed upon the Government.

A Baker's Dozen

In older days pedlars in broad were formerly supplied with thirteen loaves for the price of twelve, the additional loaf representing their profit. It is also said that to avoid the risk of giving short weight (an offense visited with heavy punishment), bakers were accustomed to give thirteen loaves for twelve. But they don't do it now.

A professor of Dublin University believes the earth may be growing warmer under the influence of radioactive forces.

Scope Of Department Of Health Increased

Welfare of Canadians is Being Well Looked After

One of the most essential duties of a government is the proper protection of the health of its people. This thought became so forcible in its demand for action that a Department of Health was formed at Ottawa in 1919, its primary factors being derived from other departmental branches concerned with health matters.

Since its inception the scope of the department has gradually increased, and now in Canada, health is "the word strong," concentrated effort working for the welfare of Canadians through the medium of the Health Department.

The Quarantine Service of a country stands for protection against the introduction and spread of contagious diseases. In this connection there are in operation five large completely organized quarantine stations. Every port of entry through its custom officer acts as a sub-station.

A medical inspection of immigrants is carried on at all ports of arrival and immigration officers are physically all prohibited from entry.

The suppression and control of the narcotic drug traffic has a world-wide significance, and Canada, through this department, stands to the front in the work accomplished. Approximately 253 pounds of opium, 250 ounces of morphine and heroin and 127 ounces of cocaine were seized in Canada during the past year. No fewer than 268 alien and resident aliens from Canada after conviction for various offences under the Act.

Suggests Lindbergh Monument

A Lindbergh monument in the form of the world's highest tower, atop which would be a million candle-power beacon, visible 300 miles away, has been proposed for Chicago by a former chairman of the United States Shipping Board. The tower would be moored after the Eiffel Tower, which is 944 feet high, but would be nearly 400 feet higher. It would be a beacon for almost all the world. The proposed structure would cost several million dollars.

A Wonderful Telescope

A giant telescope which is to be erected on Naval Hill, near Black Point, South Africa, was referred to by Professor Rossiter, of Michigan University, United States, at a university luncheon in Bloemfontein. It will be possible, through the giant telescope, to discern an object at least half a million miles away, he said, and it will be possible to see in the moon objects the size of a cathedral.

A Thirty-Two Years Sleep

A remarkable case of a woman who slept steadily for 32 years was reported some time ago from Sweden. Karoline Karlander was a school girl of 13 when she suddenly fell asleep over her books in the schoolroom. She slept for 32 years, and when she awoke found that her childhood and girlhood were long past, and that she was a middle-aged woman of 45.

Fishing Is Getting Better Water Is Becoming Lower

To be successful these times one must have the best of lures. The fish are becoming educated--Harder to catch.

Moral. Use flies as close to nature as it is possible to procure. We have them--all varieties in assorted sizes.

Coming - Saturday, July 16, "Macfadden's Flats," at the Palace and Grand Theatres. 46-2c

Miss Kay Crosby, of Vancouver, was a visitor with Adele Whiteside during the past week.

Mrs. D. Price of Fernie was the guest over the week end of Mr. and Mrs. J. L. Lonsbury.

Mrs. Rippon and children are spending two weeks at South Fork with Mrs. Hall.

Mrs. Davidson and granddaughter Ruby Rhodes of Bellevue are visiting with Mrs. Holmes, Sixth street.

Mr and Mrs. O. E. S. Whiteside and daughter Adele left Wednesday morning on a motor trip to Spokane.

Mr and Mrs. L. Lindoe are spending their vacation at the home of the latter's parents at New Dayton, Alta.

Mr. and Mrs. Stewart Milley and Mrs. W. Burrows motored to Calgary on Sunday to attend the exhibition and stampede.

Mr. and Mrs. Malcolm Morrison, who are visiting here, took a party of visitors to the camp at Lee Lake last Friday.

Capt. R. F. Barnes leaves on Monday for Sarcee camp, and states there are still a few vacancies on the 93rd Field Battery for young men wishing to go to camp.

The office of the town secretary is a busy place at the present time, the school tax notices being sent out, which will reach the people during the coming week.

Mr. and Mrs. Stokes and daughter May, former Coleman residents, now living at Evansburg, ninety miles west of Edmonton, are spending two weeks holidays in Coleman and district.

William and George McLean, and J. Shields, of Red Deer, cousins of Mr. McLean, were visitors here last week at the McLean-Foster wedding, as also were Mr. and Mrs. Ernest McCrea, of Macleod, the latter being a sister of the bride.

Mr. and Mrs. E. F. Gare and children left on Friday morning for Kaslo, B. C., to spend a few weeks holidays. They have not settled on any definite plans for the future, and will return to Coleman before finally leaving.

The swimming pool has been the resort for the young people during the week, and though they find the water somewhat cool, yet they take great delight in the joys of diving and swimming. It will be found a great boon during the hot month of summer, and will doubtless increase in popularity.

Mrs. J. E. Poppitt, of Calgary, who spent last week visiting here with Mr. Poppitt, who has been making the assessment here during the past few weeks, returned to the city last Friday evening. She also visited an old friend at Bellevue, who came from England several years ago on the same ship.

Mr. and Mrs. A. Beveridge and A. Muir are spending a holiday at the Pacific Coast.

A fishing party including J. L. Lonsbury and sons Al. and William, Jack Nash and Tom Holstead, spent the week end on a fishing trip at the North Fork. Though the catch was not very good, they had a very enjoyable outing.

The care that people take in beautifying the surroundings of their homes denotes civic pride, and the number of those who are cultivating gardens and lawns in Coleman is worthy of note. It shows what can be done with work and care, and the satisfaction and pleasure it gives in return well repays the labor and expense involved.

Mrs. Halliwell and daughters, Margaret, Marjorie, Wilma and Audrey, arrived last Sunday morning from Little Woody, Sask., where they have been visiting Mrs. Halliwell's parents since leaving Weyburn. They have taken up residence in the house formally owned by Ernest F. Gare, Sixth street.

Heavy cardboard sheets size 22 x 28 inches for show card writing or printing may be obtained at The Journal, in colors Orange, Blue, Yellow and White.
